MTL 2.5

Modeling to Learn
Test. Don't guess.

MTL objectives include activites and competencies that...

1. Are meaningful for you and align your learning goals with your team.
2. Develop systems thinking skills to help you see how several things fit together, & understand causes hard to see without data & modeling resources.
3. Make VA data, initiatives, and standards transparent to you.
4. Empower you to realize ongoing improvements in team quality of care & work life.

How to: Navigate the Data UI

Reset: Click to reset all your filters for **all tabs**. (Use with caution!)

Bookmark: Click to save your selections and filters for all tabs.

Full Screen: Click to go into Full-Screen Mode.

Filters

Filters Panel: Use this panel in the **data tabs** to narrow down individual patient information.

Note: Viz tabs have an additional filter built into the graphs for additional filter options (e.g. VVC filter in vizEnc).

Homepage: Clinic Selection will be your homepage. Filter through the light blue and dark blue columns to narrow down clinics in the green column and then select and click "Apply" to generate your team's data.
